Company Overview

Plus tip:

Customize by adding specific client success stories or certifications to highlight company reliability and expertise.

Leading Manufacturer & Exporter

Hridhan Chem specializes in producing and exporting premium cosmetic colors used extensively in cosmetics, personal care, and home care products across global markets.

Quality & Expertise

We use both organic and synthetic pigments under strict hygienic conditions, ensuring high durability, softness, and compliance with USA FDA regulations for safe, long-lasting cosmetic colors.

Quality & Expertise

Our well-structured warehousing unit efficiently stores large volumes of cosmetic colors, maintaining product quality and pH stability, ensuring timely delivery and customer satisfaction.

Cosmetic Colors

Plus tip:

Customize details with specific client examples or product lines to highlight your company's unique strengths in cosmetic color manufacturing.

Manufacturing Process

Cosmetic colors are crafted using a combination of organic and synthetic pigments, dyes, and lakes tailored to client specifications, ensuring high-quality outcomes.

Softness and Quality

Our cosmetic colors are extremely soft and finely milled, providing smooth application and superior texture suitable for sensitive skin.

Durability and Stability

Colors are formulated to maintain durability with consistent pH levels, ensuring long-lasting vibrancy and resistance to fading over time.

Regulatory Compliance

All cosmetic colors comply with USA FDA regulations, combining dyes and pigments under strict hygienic conditions to ensure safety and quality.

Cosmetic Pigments

Plus tip:

Include examples of specific makeup products popular with your audience to increase engagement.

Wide Facial Applications	Our cosmetic pigments are extensively used in foundations, blushers, powders, and other facial makeup products to provide vibrant and attractive color effects.
High Opacity & Durability	These pigments offer excellent opacity and resistance to solvents, ensuring long-lasting color that maintains its intensity throughout wear.
Enhanced Appearance with Titanium Dioxide	Incorporating titanium dioxide, our pigments brighten and lighten facial makeup, giving a flawless and radiant look that enhances natural beauty.

Surface Treated Pigments

Plus tip:

Customize by adding examples of popular cosmetic products using surface-treated pigments to connect with your audience's interests.

Creamy Texture & Long Wear

Our surface-treated pigments are formulated to have a smooth, creamy texture that ensures easy application and long-lasting wear, ideal for foundations and pressed powders.

Decorative Cosmetic Ingredients

We produce a range of dyes, lake colors, and pigments specifically designed for decorative cosmetics, enhancing color vibrancy and durability in makeup products.

Decorative Cosmetic Ingredients

Using advanced surface treatment techniques, we achieve extremely soft pigment surfaces that improve product stability and aesthetic appeal in cosmetic formulations.

Applications of Cosmetic Colors

Plus tip:

Use high-quality product images and examples specific to your audience’s preferred cosmetic styles to make this slide visually engaging and relatable.

Lip and Face Products

Used in lipstick, lip gloss, lip balm, blushers, and foundation to provide vibrant, smooth, and durable color that enhances facial beauty.

Eye Makeup

Applied in eyeliners, eye shadows, and mascaras to add depth, definition, and long-wear color for eye-enhancing effects.

Nail and Compact Cosmetics

Used in nail paints and compact powders to deliver rich pigmentation, smooth application, and lasting finish for nails and skin.
